- Computer/programming: MS Office, Stata, SQL, R, SAS, Python, Qualitative & Quantitative Methodology, CRM system
- Certificate: SAS SQL1, SAS Macro Language 1, SAS Programming 3, Hertie Summer School Data Science Bootcamp

RESEARCH

Does Marijuana Affect Employment Rate?

May. 2023

This study examines the causal effect of marijuana use on employment rates, modeling data in Python and STATA. Our findings suggested that there is no significant causal effect of marijuana use on employment rates. These findings had important implications for policymakers and employers, particularly in light of the increasing legalization of marijuana in many states.

Financial pressure on domestic waste disposal and environmental protection

Aug.2021

Collected Chinese provincial data, helped building regression for getting causal relationship between the disposal and financial expense, modeling data by STATA, and finished the final hypothesis test

Experience
